DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species:

- Species I directed to figures 2 and 5
- Species II directed to figures 3 and 6

The species are independent or distinct because they represent mutually exclusive species.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

This election/restriction requirement was not previously made because the claims were previously considered to be generic. However, in view of the amendments to the claims, this is no longer the case. Specifically, it appears impossible for the electrodes represented by figures 3 and 6 to provide a hollow interior for printing fluid to pass through. Therefore, for clarity of the record, the applicant must elect a species. If the applicant would like to prosecute the invention directed to Species II, amendments to the claims must be made, otherwise the examiner will make a 112 rejection.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 2853

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
